

Newly certified repair shop in accordance with the VPI Maintenance System in Central Europe

VÍTKOVICKÉ ŽELEZNIČNÍ OPRAVNY a. s.

We are the leading provider of revisions, repairs and technical inspections of railway freight wagons, certified in accordance with the Maintenance Systems **KVs5-B-2010** and **VPI** in the range of **G4.0** and **IS2**, and we own the **SÚNV** maintenance regulation.

WE USE THE LATEST TECHNOLOGICAL EQUIPMENT:

- New line for repair and revision of wheel-sets (electronic diagnostics of wheelsets, mobile internal stress measurement).
- New surface treatment facility (new blasting and painting box).
- New rail weight for axle-load weighing.
- Separate workstation for performing routine repairs of the wagons.

WE OFFER TO CUSTOMERS:

- Routine repairs of wagons.
- Revisions and technical inspections of wagons.
- Refurbishment of wagons.
- Complete repairs of the wagon body-shells.
- Reprofiling of wheelsets of the wagons (empty and loaded), passenger cars and locomotives without dismantling the bogies.
- Production and repairs of the wagon components.
